

Valley to Stage a Real Racket Tournament

PAADOCK READY FOR LONG TRIP

Charles Paaddock, demon sprinter, will leave Los Angeles tomorrow noon for Paris, France, there to compete in the Paris Intercollegiate. Paaddock said that he would run in the meet in spite of the efforts of the A.A.U. to have him kept out. However, Paaddock hopes that the A.A.U. will back him on his trip and thus avoid any trouble.

McKane in the majority of matches the first year. Mrs. Ryan, Mrs. Beaulieu, Mrs. Peacock, Mrs. Battersby and Mrs. McNeil will be the women who should be the real test for Miss Bancroft in England, with Mrs. Golding and Mrs. Hill. Miss Bancroft split even with all of these women—with the possible exception of Mrs. Ryan, who is slightly superior to the others. Miss Bancroft, at her best, is better than any of them, but her average game is not quite so good. So then I should credit her with about an even break.

The unusual conditions and strain of international competition take away from every athlete. Some few it keeps up to superlative; the majority fall below their normal form—at least for the first season. I am expecting Miss Bancroft to do well in the later tournaments. Wimbledon and St. Cloud, but hardly look to see her show much in the events along the Riviera this month. She is playing this season with the laudable idea of gaining experience and not with the idea of marked success. She is wise to view her trip from that angle; provided she does not let the belief that she cannot win hold her down and cramp her naturally aggressive style.

I know that her defeat by Mrs. Cole in the national indoor championship was a disappointment to Miss Bancroft, but when it was due to a combination of fine tennis by Mrs. Cole and lack of confidence by Miss Bancroft, it may teach the latter a lesson and prove to be a blessing in disguise. Miss Bancroft is a very good player, and her experience in international competition and knowledge of the various players and their games should prove of great value to Miss Bancroft.

SANTA ANAN DIES OF AUTO CRASH INJURIES

(SPECIALS DISPATCH) SANTA ANA, April 9.—William Winslow, 39 years of age, of Santa Ana, was dead here today as the result of injuries received last Thursday night in an auto accident on the Huntington Road when he sustained fractured ribs and serious internal injuries. Death occurred at the Community Hospital where Winslow was taken after the accident.

THIEVES GET CASH

(SPECIALS DISPATCH) SAN BERNARDINO, April 9.—Velvet-fingered crooks using the "touch" method, robbed the Piggy Bank store here of \$110.47 in cash and checks late Saturday or Sunday night. It was discovered early today. The safe crackers cut their way through the rear door with a brace and bit. Inside they worked noisily in manipulating the combination of the safe. So clever did the thieves work that officers today were without a tangible clue. Wearing gloves, the robbers left no finger prints.

TO WELCOME SAILORS

(SPECIALS DISPATCH) SAN DIEGO, April 10.—Wives, sweethearts and friends of the blue jackets stationed here are eagerly awaiting the arrival tomorrow of the destroyer squadron from the Pacific. The homecoming celebration will be held at the home of the destroyer squadron. The homecoming celebration will be held at the home of the destroyer squadron. The homecoming celebration will be held at the home of the destroyer squadron.

LACKS EXCITEMENT

The bout when it got under way wasn't particularly exciting. Lewis was very cautious and I didn't get many openings. I felt that I was scoring all the points. Between rounds I would ask Dan how it looked and he was not one of those "yessers" who would hand you the "soft soap."

"CHIEF" MYERS IS ON ROAD TO RECOVERY

(BY A. P. NIGHT WIRE) FRESNO, April 9.—Elmer ("Chief") Myers, Salt Lake Pacific Coast League pitcher, operated upon for appendicitis at a local sanatorium last Saturday afternoon. He is reported recovering today. The operation was successful and the big "chief" passed a painful night. He will rejoin the ball club in about two weeks, unless complications develop.

STRENGTHEN VITAL PARTS

People Eat Too Much Says Barclay L. Severns in Latest Talk on Perfect Health

BY BARCLAY L. SEVERNS

Countless millions of little cells are the units which make our body, and just as one individual or one orange is liable to spoil others with which it comes in contact, so the bad cells of the body quickly exert bad influence. The blood is busy every minute of the day and night carrying off dead and broken-down cells, and bringing new cells to take the places of the old ones.

The blood is made from the food you eat. The body requires three kinds of food; they are necessary to human life; air, water and material substance. It is very important, therefore, that the air you breathe, the water you drink and the food you eat shall be of the quality and quantity to bring the best results. Good food is impaired in its life-giving value if the mind is working improperly, because the food does not get the right secretions for its digestion.

It has been said that most Americans who die have dug their graves with their teeth, and there is much truth in this statement. We all eat too much.

I shall not tax you with the rules of diet. You should be able to eat what you like, but the one thing to keep in mind is that we all eat too much and this impedes the work on the digestive organs; it builds up fat, and the fat requires the building of a lot of extra veins and that makes just so much more work for the heart.

The human engine is very elastic in its power; it can do a prodigious amount of work, and nature has arranged that in such cases the human engine can consume large quantities of food and take care of it properly.

The trouble with most men is that they feed their 100 horsepower boilers going to full capacity when the work requires only a few horsepower.

My 20 Years in the Ring

BY JACK BRITTON

(Copyright, 1922, by Jack Britton, by New American Newspaper Alliance.)

Every time a champion goes into the ring for a decision fight he takes a chance that is worth a lot of money to him. That is one of the reasons why champions and first-class contenders ask such big percentages for boxing under the decision law in New York.

I do not mean to create the impression that there is anything shady in the work of judges and referees in New York or other big boxing centers. On the contrary, I am sure that the quality of the decisions, such as took the titles away from Harry Greb and Pancho Villa were sincere opinions of the officials that they had lost, but that their judgment was founded on mistaken ideas about the value of points.

PAULIE JUDGMENT The loss of my championship to Ted Kid Lewis in Dayton, O., in 1917, I have always thought was due to faulty judgment, although I admit that because we very few who will admit that they lost a decision on slim points. Perhaps there is some truth in the opinion that a boxer in the heat of action is not in a position to give an accurate judgment of his own work.

Anyway, I lost a twenty-round decision and the title to Lewis and it stands on the books. Battling Levinsky was scheduled to fight in the East several days before my bout with Lewis was to be held and Dan Morgan, figuring that he was needed in Levinsky's corner, did not go out to Ohio until the day before the fight.

I went to Cincinnati with my brother-in-law, Harold Morton, to do my training as the promoters thought my presence there would increase interest in the bout among Cincinnati people.

REFeree SQUABBLE There was the usual controversy about the referee, Morgan holding out for Walter Kelly, but I got tired of the arguments and agreed to Lou Bauman, a Cincinnati man, who was highly regarded in that section as an official.

My only purpose in training was to get my legs strong and wind good. I didn't have to do much boxing, as I knew enough about Lewis to feel sure that I could beat him if I was strong enough to keep going fast for twenty rounds.

Just before the bout started on the night of the fight, Morgan told me to keep him off with my left hand and try to wear him down as I never had much trouble in reaching him with a right.

"Hit it up in the twentieth round if it goes that far. Lots of decisions go on the last round regardless of what is done before," he said.

LACKS EXCITEMENT The bout when it got under way wasn't particularly exciting. Lewis was very cautious and I didn't get many openings. I felt that I was scoring all the points. Between rounds I would ask Dan how it looked and he was not one of those "yessers" who would hand you the "soft soap."

"You're going along easy. You're way out ahead. Watch your punches and don't get any way near low," he said several times. We were always careful about "foot decisions."

I felt all along that I was winning by a mile. I rested up about every other round and when the nineteenth finished I was perfectly fresh.

"Go out there now and go to it," Dan said as the gong rang for the twentieth and last round. I did. I gave Lewis everything I had and put him down with a left hook to the jaw for the count of nine. He got up and held on so I could get another shot at his jaw. He was weak in the knees when the round ended and he wavered over to his corner.

CERTAIN OF VERDICT Feeling positively sure that there was no question about the verdict I waited back to my corner. For no particular reason I turned around toward the referee as I was getting into my robe and saw him point to Lewis as the

Brick Eldred Heads Hitters of Coast Loop

(BY A. P. NIGHT WIRE) SAN FRANCISCO, April 9.—With seven hits out of ten trips to the plate, "Brick" Eldred, Seattle, topped the Pacific Coast League hitting list with an average of .700 for the first week's play ending Saturday. Koehler and Kopp, Sacramento, take second and third places with averages of .647 and .625, respectively.

For fourth place Gardner, Seattle, piled up an average of .500 even, while Schneider, Vernon, and Cather, Oakland, come next with .444 and .444. Wilbitt and Pearce, Salt Lake City, each landed in the percentage garden halfway between top and bottom with .333 even.

Other hitters high in the league averages are: Van and Coughlin, San Francisco, and E. Murphy, Vernon, all leading at .400; Eldred, San Francisco, .389; Griggs and Tremble, St. Louis, .389; Peck, Salt Lake, .375; Bode, Kansas City, .375; and Egan, Sacramento, .375.

For stolen bases, Eldred, San Francisco, headed the list with 15, followed by Griggs, Sacramento, with 14, and Pearce, Salt Lake, with 13. Eldred, Griggs and Pearce, Salt Lake, are all credited with one.

INDIANAPOLIS AUTOS BEGIN TO ARRIVE

(SPECIALS DISPATCH) INDIANAPOLIS, April 9.—The first of the racing cars to begin practice for the 500-mile race which will be held on the Indianapolis Motor Speedway May 30, are expected to arrive May 1. The next major racing event will be at Fresno, Cal., April 26, and the drivers and cars will come to Indianapolis immediately.

PLAN GOLF TOURNEY

It was learned yesterday from M. V. Hartman, manager of the golf department of the B. H. Dry Company, that a golf tournament is to be played at the Hillcrest club between the junior and senior members.

The major league season will get under way next Tuesday.

It's the follow-through—that extra drive that carries through the entire swing—that lifts the ball over the fence. "Home Run" power is missing in the half swing or tap.

No Detonation

—a feature of this gasoline

GASOLINES explode in two ways. Some detonate—explode instantaneously. They depend on a single crashing blow to pound the piston down.

Because of a tendency to explode prematurely they limit compression, thus reducing power and efficiency. Detonation causes much of the "knocking" which you notice on hills. And the crashing blows, repeated, increase vibration—more wear and tear.

Sustained Impulse

Union Gasoline is different. It is non-detonating—produces a sustained explosion. It thrusts the piston throughout the entire stroke, doesn't crash against it. And because it doesn't detonate, it permits full compression in your motor. For authorities agree that compression is limited by the tendency of a gasoline to detonate.

Stronger on Hills

With Union Non-Detonating Gasoline, you'll notice a new "lift" on hills, new speed on the level, and more snap in the pickup, all due to increased compression and pistons that are thrust down all the way.

Sustained impulse also means less vibration, which saves wear and tear. All this means high efficiency, which results in increased fuel economy.

So there are several good reasons for the use of Union Non-Detonating Gasoline.

Union Non-Detonating Gasoline is the product of progressive refining methods. Its quality is governed by exhaustive tests. The research of able chemists, equipped with the finest facilities for studying refining methods, is constantly devoted to its improvement.

NEW WITNESSES CALLED IN MAJOR'S DEATH QUIZ

Army Board of Inquiry Returns Cronkhite Shooting Decision After Questioning Four

BY DONALD EWING
Chapter II

The Army Board of Inquiry, which investigated the death of Maj. Alexander P. Cronkhite at Camp Lewis, Wash., five days after the young officer had been found dead fifty yards from a column of soldiers he was commanding, decided that he had accidentally killed himself with his revolver.

The board reached this decision after a hearing at which the only witnesses called were Capt. Robert Rosenbluth and Sgt. Roland Potlier, the two men who were with Cronkhite at the time of the fatal shot and who were called forward after the shooting. Not a word was said in their testimony about the fatal shot and the board was summoned to investigate the facts of the case.

The first question asked Potlier was: "Were you present with Maj. Cronkhite at the time of the accident?" He answered: "Yes, sir."

Q: "How near were you to the major?"
A: "I was about fifty yards from him."

Q: "Did you see him when he was shot?"
A: "Yes, sir. I saw him fall."

Q: "Did you see him when he was shot?"
A: "Yes, sir. I saw him fall."

Q: "Did you see him when he was shot?"
A: "Yes, sir. I saw him fall."

Q: "Did you see him when he was shot?"
A: "Yes, sir. I saw him fall."

Q: "Did you see him when he was shot?"
A: "Yes, sir. I saw him fall."

Q: "Did you see him when he was shot?"
A: "Yes, sir. I saw him fall."

Q: "Did you see him when he was shot?"

PRISON HAS NO MEN OF PROFESSION

Sing Sing Ends Year With Representatives of Many Walks of Life

OSSENING (N. Y.), April 9.—Sing Sing, for the first time in years, included not one professional man among its convicts last year, Dr. Amos O. Squire, the prison physician, announced yesterday.

Among the 1457 prisoners received were 120 laborers, 101 chauffeurs, seventy-nine clerks, fifty-six tailors, forty-eight salesmen, forty-six drivers, forty-five cooks, forty-three waiters, thirty-five firemen, thirty-five electricians, thirty-three longshoremen, thirty-two plumbers, twenty-nine carpenters, twenty-seven machinists, twenty-five blacksmiths, sixteen shoemakers, fifteen bakers, fourteen accountants, and twelve teamsters.

One of the most interesting features of the Sing Sing prison is the fact that the convicts are all men of profession. The prison physician, Dr. Amos O. Squire, announced yesterday that the prison had no men of profession among its convicts last year.

CONGRESS WILL WAR ON KU KLUX

William Burns Returns Action to Drive Hooded Order From Country

NEW ORLEANS (AP) April 9.—Congressional action against the Ku Klux Klan followed by a "lame duck" session of the House of Representatives today, as the Department of Justice announced that it had received a letter from the United States Senate, dated April 8, asking for a bill to drive the hooded order from the country.

Much as I would like to see the Ku Klux Klan driven from the country, I am not prepared to do so until the Department of Justice has received a letter from the United States Senate, dated April 8, asking for a bill to drive the hooded order from the country.

The Department of Justice has received a letter from the United States Senate, dated April 8, asking for a bill to drive the hooded order from the country.

PROF. R. G. BOONE DIES AT BERKELEY

Richard Gauss Boone, former professor of education at the University of California, died at his home in Berkeley, California, yesterday after an illness of several years.

Petite Wafers

You see them everywhere. Served in homes and cafes. Sold in any store you step into. Baked fresh every day—and then we're on the jump filling orders. 3 size packages—and by the pound.

BISHOP & COMPANY

BISHOP'S

Natural Food Is Most Important for Children

The most natural foods are the most beneficial, especially for infants and children. Nature intends milk to be consumed exactly as she produces it—clean, pure and free from special treatment of any kind.

Certified MILK is produced according to the most rigid standards of cleanliness.

These standards are constantly maintained at Arden Dairy. Inspections at the farm are repeatedly made by the Medical Milk Commission and by the Department of Health.

Doctors are constantly recommending Certified Milk, because they prefer to start with a natural product of known cleanliness, regardless of any modifications which may be necessary to meet specific feeding requirements. Doctors recommend

Arden Certified Milk

because the milk from Holstein cows is conceded to be best for infants and children. Its flavor surpasses any other. It is rich and most uniform from cap to bottom of bottle.

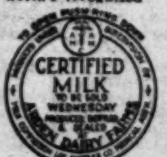

Thousands of babies and children are receiving Arden Dairy Certified Milk each day. The most conclusive proof of its life and health giving qualities rests in the statements of mothers whose own children are being guided happily through their years of growth and development by this pure natural milk.

Costs a little more than the common kind as all superior articles do.

DR. THOMPSON M. ROTCH

Professor of Pediatrics at Harvard University, and world's recognized authority on infant feeding. Here—From the medical point of view the Holstein milk is exactly what we find best for infant feeding. The Holstein cow represents the most perfect milking animal known, having every characteristic suitable for baby's milk supply.

CALIFORNIA'S LEADING GROCER

No need to say, "I wish I dared"

How often have you heard the expression, "I can't drink coffee; it doesn't agree with me!" Yet there is an undeniable satisfaction in having a hot drink with meals.

Postum supplies satisfaction and safety, both. No need to deny yourself the pleasure of this fragrant, invigorating cup through fear of nervous disturbance afterward. Postum is rich and comforting, and there's nothing in it that can harm anybody.

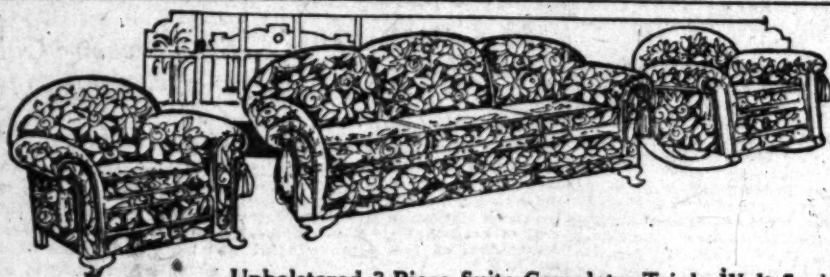

Why not follow the example of the thousands who have left off the risks of coffee, for the assured satisfaction and safety of Postum?

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

BUSINESS NEWS OF BUSY MARKS

Bond Market Is Anticipating Consolidation Benefits

Raw Materials Form Largest Part of 1932 Imports

Far Eastern Trade; Lumber Movement; Holly Sugar

As the discussions and hearings relative to railroad consolidations progress, and the decision of the Interstate Commerce Commission to combine the weak and the strong roads into self-sufficient systems become more apparent, the bond market is attempting to discount the advantages that would result from the consolidation.

The Western Pacific and the Denver, Rio Grande and Western systems are the two most prominent in all of the merger schemes. The latter is particularly active in "over the counter" trading, and bond buyers here say that the market has been well cleaned of offerings.

Denver & Rio Grande Western first consolidated in 1912, and since that time has been a leader in the movement to receive the same attention from speculative buyers.

They are active in the market, and a high in January of 1932, and for 1932, of 32.

That the buying of the obligations of both railroads is predicated largely on the anticipation of consolidation is deduced from examination of their offerings for the six months ended Dec. 31, 1931. Western Pacific made a better showing of the two, but it is unsatisfactory when compared with earnings of other systems.

After deducting 1.21 per cent was earned on the common stock, while interest charges were earned 2.53 times. Denver & Rio Grande Western showed an operating income of \$2,777,000, which, after charges, allowed interest to be earned 2.3 times. Nothing was earned on the common.

ANALYSIS OF IMPORTS

Raw materials for use in manufacturing formed 27 per cent of the value of imports received in the United States during 1931, with foodstuffs and food animals making up 11 per cent, according to statistics compiled by the Department of Commerce. Manufactures for further use in manufacturing amounted to 18 per cent, and manufactures ready for consumption 21 per cent.

For the month of December, imports totaled \$292,468,492, a gain of \$15,218,087 over the same month of 1931. Europe was the source of the greatest amount, supplying tonnage valued at \$120,554, an increase of \$24,467,456 over the corresponding period of 1931.

Following the decrease in revenue in production in the European countries.

North American countries were third in point of origin of imports into this country, valued at \$44,813,874, a substantial gain over the December of 1931. South America was fourth with \$29,181,401, Asia with \$21,844,541 and Africa with \$1,125,153 supplied the remainder.

Canada took the lead in exports to the United States, with a total value of \$56,831,614, with Japan second and the United Kingdom third.

FAR EASTERN IMPORTS

Imports from the Far East, principally Japan and China, are coming into Los Angeles Harbor in a steady volume despite the dullness of the season. The months of July, August, September and October are usually the best in this trade, according to C. D. Hudson, manager of the foreign department of the Citizens National Bank, but the movement at the moment is satisfactory.

The financing of the imports from the Far East is done by banks here, and the trading in the case of Japan, is generally between Japanese, with Americans participating in only a small fraction of the business. The large proportion of the State's Japanese population is in Southern California.

Mr. Hudson says, and the presence of this group is responsible for the larger part of the demand for Japanese goods.

Commodities entering into the import trade from the Far East are cotton crops, food stuffs, silk, crockery ware and novelties. The yearly volume of the business approximates \$1,000,000.

LUMBER TRAFFIC

Lumber handled over the Pacific Electric lines in 1932 was 100 per cent greater than in 1931, and now ranks third as a revenue producer of all the commodities transported by the company.

This statement is a direct reflection of the rise of Los Angeles Harbor to pre-eminence as a Pacific western lumber port as the Pacific Electric hauls a large part of the harbor traffic over its lines.

As told by C. F. Sullivan, assistant to the freight traffic manager in an article in the Pacific Electric magazine in circulation today, a total of 1,897 carloads of lumber were handled via water to the gateways of Southern California in 1932, the majority of which was distributed later by rail lines entering the harbor.

Aside from the building activity in Southern California, Mr. Sullivan's

WEATHER HAS HURT NEW CROP

Insects Also Take Toll From Wheat; Retailers Report Good Trade

BY ARCHER WARD DOUGLAS (EXCLUSIVE DISPATCH)

Several things are becoming evident as the growing season opens. One is that the growing wheat crop went somewhat backward during the critical month of March.

Wheat, like all grasses, is a hardy plant, but it cannot stand a prolonged drought accompanied by high temperatures and high, cold winds, and not show deterioration. This is what happened to it in the western portion of the Great Plains States.

Further East it was exposed in many sections to alternate freezing and thawing, which is bad for it, as such alterations in temperature lay bare the roots to the winter's cold. Then there are reports of a green, leafy wheat in some sections, which is a sign of a good crop.

It will take another thirty days to develop the full crop, but so far, on the whole, the crop is good. The winter wheat crop will not be such a large crop as last year. In the spring wheat section, on the other hand, the outlook is most favorable, as the soil has an abundance of moisture, which is the best possible preparation for seeding and subsequent growth. This same generous precipitation extended virtually all over the country recently, it was of immense benefit to the stock raisers in the Northwest, to have been close to the ragged edge of trouble for a long, weary period.

Belated blizzards that went far south did some harm to fruit, but not so much as early dispatches would indicate.

The general business of distribution held up well, but is much hampered by shortages of goods. Production in industrial life is very heavy and manufacturers are taking advantage of the situation to advance prices. Workmen follow suit, or quite as often lead.

Leads in the natural law will take a hand in the game and we will start all over to readjust the things in a more sober fashion. Only the readjustment we are anxious to bring about will not come in an orderly way, but with these conditions of violent swings which always distinguish nature's way of handling such matters.

Meanwhile, retail trade in the great centers is much better than in the country districts. For the farmer is out in the field working a ten-hour-and-more schedule and the country store has the frequent effect whenever this prevails as sending time travels steadily.

Business is far better than twelve months ago and will continue to grow. The country store is now overhauling the United States.

COTTON CLOSES HIGHER IN QUIET SESSION

(EXCLUSIVE DISPATCH)

NEW YORK, April 9.—Cotton futures closed at 17 points higher after a quiet session today in which the list held generally steady. Fluctuations were within extremely narrow range. Active trade buying of old crop months furnished the larger part of business in those options and scattered crop selling of the new crop months caused them to display a lagging tendency. The list started 13 to 14 points net higher, but reacted 3 to 7 points and then advanced to a level 14 to 23 points net higher before midday. Prices continued rather firm in the early afternoon, but further profit-taking from the recent bull element developed, and this combined with new short selling for a turn, caused a reaction. With prices slightly easier, the market was somewhat more active in the late trading, and although showing net gains, final bids were around the day's low.

The local market for spot cotton was quiet, unchanged, 50 cents lower than the day's low.

Southern markets: Galveston, 29.75, unchanged; New Orleans, 29.75, 25 points advance; Savannah, 29.30, unchanged; Augusta, 29.31, 15 points advance; Memphis, 29.50, unchanged; Houston, 29.65, unchanged; Little Rock, 29.75, unchanged.

DAILY TRADE TALK

Samuel M. Vauclain Would Rather be President of Baldwin's Than Run the United States

BY RICHARD SPILLANE (EXCLUSIVE DISPATCH)

NEW YORK, April 9.—Samuel M. Vauclain's reply, "I'd rather be president of Baldwin's, it pays better and is more fun," to the question of being a candidate for the Republican nomination for President of the United States costumed quite a bit of comment in Wall Street.

There were some remarks about as follows:

"We never have had a business man as President, yet managing the affairs of this government is the biggest business job in the world. Many years ago and grew into a hard man's world with it.

"Charles M. Schwab finds joy in his work and that's one of the reasons he's a success. The executive who finds joy in his work is almost invariably a success. A business concern reflects the spirit of the man at the head. Workers are proud of a boss who loves work. One of the great troubles of the world today is that work is viewed generally as a task, not a vision of immeasurable worth. If we didn't work we'd stagnate and starve. There is something of romance and interest in nearly every industry in which man is engaged, no matter how crude or coarse or dumb it may appear to be.

"The greatest difficulty today in the world is that too many of us have lost the sense of the foundation of everything worth while. 'Mr. Vauclain is right. The president of Baldwin's pays better and there's more fun in it than in being President of the United States.

"Mr. Vauclain may get more money for his services than most of us but he can get no more pleasure out of it for the greatest fun in the world is work and all can share fully in the joy there is in work."

MARKET REVIEW

(EXCLUSIVE DISPATCH)

NEW YORK, April 9.—In most markets today was an occasion of uncertainty and in some degree confused movement. On the stock exchange, where the business done was smaller than on any but four or five full days this year, the action of prices was conflicting all day and the final changes wholly irregular. Apparently the market reflected a situation in which no one was actively interested except professional speculators and in which they were uncertain as to the future of values.

In Wall Street, this conduct of the market was again discussed as something difficult to understand in the light of the highly favorable industrial conditions. If Wall Street's memory was not so notoriously short in matters of this kind, it might at least have recalled the fact that precisely such an uncertain pause has occurred on the stock exchange in every previous season of reviving trade, when prices had been steadily "discounted" the situation, when the money market's future was still problematical and when the investing public was awaiting new developments. But such an attitude on the market's part, however, was not in evidence. The market was excited by the same old news and doublets always will.

The movement of foreign exchange was more interesting than that of stocks, but it was no more uniform. Short-term rates, 1 to 2 cents to 4.85 1-4, the lowest price since the end of January, nearly 1 cent below the year's highest figure and not far from the ruling rate of last December. But French exchange advanced as rapidly as starting declined, reaching a rate not quite 2 cents per franc above the present year's lowest and except for two days in March, the highest since the week of the march into the Ruhr. This movement appeared to result rather from conditions in the market itself than from anything in the news; but the French Republic's speculative account had been mostly committed to the rise in sterling and the franc had been raised by making the two sections of the market sensitive to influences bearing in opposite directions.

BUILDING PERMITS

Complete Furnishers of Successful Offices

-double-duty

THE MONEY YOU INVEST should perform two duties. First, it should bring you a regular safe interest—the "rental value" of your money. Second, it should bring a substantial profit—the "earning power" of your money.

Equitable Preferred does this double duty. It brings 7%, regular as clockwork, and also affords a prospect of 20% or better in company earnings.

In addition to this, you should not forget the probable increase in the value of the stock.

Profit Taking Fails to Halt Grain Prices

(EXCLUSIVE DISPATCH.)

CHICAGO, April 9.—Deferred deliveries of wheat, corn and soybean were sold at a new high for the season today as the result of general buying. Profit-taking was heavy from the start, but the market was strong and the finish was about the top, with wheat at 1.04 1/2 on May, 1.04 1/4 on June, 1.04 1/4 on July and 1.04 1/4 on Oct.

Long May wheat rose from 1.04 1/4 to 1.04 1/2 at the close and at the time it was down to 1.04 1/4. The market was very active, buying and selling on both sides of the international line. Local cash wheat and soybean were sold from buyers of May and June and July and reflected the difference to around 1.04 1/2. An application of a bullish government report was a factor in holding buying and the market was somewhat material.

No sale was shown in the Southwest where it is not needed and the market was very active. The market was very active, buying and selling on both sides of the international line. Local cash wheat and soybean were sold from buyers of May and June and July and reflected the difference to around 1.04 1/2. An application of a bullish government report was a factor in holding buying and the market was somewhat material.

Outside of the market was the buying of May and June wheat, which was sold at 1.04 1/2. The market was very active, buying and selling on both sides of the international line. Local cash wheat and soybean were sold from buyers of May and June and July and reflected the difference to around 1.04 1/2. An application of a bullish government report was a factor in holding buying and the market was somewhat material.

Heavy profit-taking was to be expected in the market, but the market was very active, buying and selling on both sides of the international line. Local cash wheat and soybean were sold from buyers of May and June and July and reflected the difference to around 1.04 1/2. An application of a bullish government report was a factor in holding buying and the market was somewhat material.

There was some buying on the part of a bullish government report, which was sold at 1.04 1/2. The market was very active, buying and selling on both sides of the international line. Local cash wheat and soybean were sold from buyers of May and June and July and reflected the difference to around 1.04 1/2. An application of a bullish government report was a factor in holding buying and the market was somewhat material.

DAILY MARKET LETTER OF THE NEW YORK COMMERCIAL

(EXCLUSIVE DISPATCH)

NEW YORK, April 9. — California market oranges were strong and active today, with prices ruling about 25 to 40 cents a box higher. Sales totaled twenty-five cars, the market ranging from \$2.70 to \$3.45 per box; one car of California budseedlings sold at \$3.00 to \$3.50 per box. A small lot of tangerines was sold at \$1.00 to \$1.15. Florida oranges ranged from \$2.75 to \$3.75. Florida grapefruit ranged from \$1.15 to \$1.45.

Almonds and Sicilian almonds, 22-24, 25-26, 27-28, 29-30, 31-32, 33-34, 35-36, 37-38, 39-40, 41-42, 43-44, 45-46, 47-48, 49-50, 51-52, 53-54, 55-56, 57-58, 59-60, 61-62, 63-64, 65-66, 67-68, 69-70, 71-72, 73-74, 75-76, 77-78, 79-80, 81-82, 83-84, 85-86, 87-88, 89-90, 91-92, 93-94, 95-96, 97-98, 99-100, 101-102, 103-104, 105-106, 107-108, 109-110, 111-112, 113-114, 115-116, 117-118, 119-120, ALIENS TO GET BACK PROPERTY

Col. Miller Arrives Here to Make Return

Bill Provides for Smaller Reimbursement

Custodian Backs Idea of Dam in Boulder Canyon

Col. Thomas W. Miller of Washington, D. C., who, as Alien Property Custodian, has charge of more than \$300,000,000 worth of property seized during the war, arrived yesterday to make arrangements for carrying out the provisions of the new law.

Approximately \$10,000,000 worth of property seized during the war in Los Angeles and vicinity is yet in the hands of the Alien Property Custodian, Col. Miller stated, but most of this will be returned shortly under provisions of the act passed by Congress.

TRUSTS GO BACK

"This legislation authorizes the return of the trusts not exceeding \$10,000, and a like amount of the trusts in excess of that value," Col. Miller stated, "and I am here to meet the machinery necessary to make this law operative in Southern California. This will involve arrangements with the Treasury Department and the Department of Justice, and will take some time. I hope to make return of property in the very near future. Any heretofore or hereafter property seized, advising my office in Washington, secure a copy of the necessary regulations, and forms within a few days."

Col. Miller stated that because of the passage of the act by Congress, more than 90 per cent of the persons interested in the return of property seized would be diminished only by approximately \$10,000,000 being held by the Alien Property Custodian, which are not returnable under provisions of the act.

There is, in the aggregate, property to the value of \$10,000,000 held by myself as custodian, along the Pacific Coast, Col. Miller stated, "and the majority of these are a number of fishing companies in which the office of the Alien Property Custodian holds either a majority or a large minority interest. In Portland, San Francisco and Los Angeles, the company-held property consists of large real estate holdings, covered by important office buildings and hotels."

SALES WILL FOLLOW
"Since the passage of the legislation authorizing the return of the trusts not exceeding \$10,000 and a like amount of the trusts in excess of that value, it is my purpose to disseminate what remains of the alien property, as far as it may appear expedient to do so, into liquid assets, to the Treasury of the United States."

"This will probably involve, in the near future, the liquidation of the properties, if they can be advantageously made. There are matters of great importance in connection with these properties in the West which made it necessary for me to make this tour of inspection."

Col. Miller, who was one of the founders of the American Legion, yesterday consulted with Legation men here, as well as with government officials. He was visited by Arthur G. Fisk, attorney for the Alien Property Custodian in Los Angeles, and local alien-property matters were discussed. Col. Miller will remain here for several days. Mr. Miller stated that before his arrival here he inspected the proposed dam site along the Colorado River at Black and Boulder Canyon on the border line between Nevada and Arizona during a trip through Nevada with Gov. J. G. Sweeney of Nevada.

DAM FAYORED
The proposed dam, if constructed, will regulate the floods that come down the Colorado River into Imperial Valley in this State and cause so much destruction, he said. It will also afford a vast reservoir for irrigation purposes in the States of Arizona, Nevada, New Mexico and Utah and create an artificial lake the size of Lake Erie. The estimated cost of the project is \$25,000,000 and no money could be better spent by the Federal government than in this manner. The people of this vicinity should be better informed actively with their Senators and Congressmen."

Salary Boosts Urged for City Building Aides

Chief Engineer Backus of the City Building Department has forwarded to the City Council's Budget Committee, with the approval of the Board of Public Works, a request for increase of salary for the technical employees of the department in order to obtain and retain men to handle the tremendous number of building permits now being handled by the department.

The Chamber of Commerce and other organizations have made similar requests of the City Council in order to speed up the checking of building permits, which is now delayed on account of the need of a sufficient number of efficient engineers in the department.

Under the schedule asked for by Chief Engineer Backus, his salary would be increased from \$4500 to \$7500 a year, the assistant chief inspector would receive \$4500 a year, structural engineers \$3500 to \$4500 a month, building inspectors from \$210 to \$240 a month.

TEACHING COURSE OFFERS
A course in problems of teaching in part-time schools is being offered at the extension division of the University of California. The class will meet for the first time this evening in the room of the Finance Building. Dr. Frederick Woelner, formerly head of the department of part-time education in Buffalo, N. Y., will instruct the class.

Welsh Program Tonight With a Choir and Male Quartet

Welsh Male Quartet

Pete. Mrs. Roussy's compositions are destined to gain in favor. She has a fine mezzo-soprano voice. Particularly beautiful was her lullaby number, "Sleep Little Love." "A Chinese Ching a Ling" is a tuneful thing. Other selections were: "My California," "Keep Smiling," "Song of Jay," and "Great Ventura County."

George Grimm, pianist-composer, favored radioland with one of his own waltz compositions, "When the lights go Out on Broadway," and played with skill and accuracy. "Il Trovatore." He is a recent arrival from the East and intends to remain in Los Angeles.

Clyde Haskell, whistler, accompanied by Ella R. MacClashan, emitted the sweet notes of "I Love You Dear," by Friml, "Summer," by Chaminade, and "Another March," by Ball. Her whistling melody was for the benefit of lads and lassies during the evening program.

Gretchen Schwinn, gifted child reader, recited "The Cricket" and "Warts," with a charm and dainty humor most effective. Apparently Gretchen sees no use in having warts, but she admits the utility of crickets.

Evangelina Reese, violinist, in Welsh program

ARMY CHIEF TO INSPECT LOCAL FORT

Gen. E. A. Helmick's Review of MacArthur Today Will Be First Visit Here

Maj.-Gen. E. A. Helmick, inspector-general of the army of the United States, will make his first official visit to Fort MacArthur this morning. A review of the garrison of port coast defenses will be conducted in his honor, and later he will inspect mortar batteries and fourteen-inch coast-defense rifles of the upper reservation.

Gen. Helmick this afternoon will conduct an inspection of the National Soldiers' Home at Sawtelle before departing for San Diego for an official visit to Fort Rosecrans and Camp Horn.

The annual target practice of Fort MacArthur's fourteen-inch rifles, scheduled for this morning, will be postponed until tomorrow on account of Gen. Helmick's arrival. It was announced by Lieut. Benjamin F. Manning, post adjutant.

SEEKS EXHIBIT SPACE

Council Asked to Authorize Building for Historical Review

The authorization of the building in Exposition Park this summer of 100 or more temporary buildings for the American Historical Review and Motion Picture Exposition was asked of the City Council in a resolution introduced by Councilman Sparks. The exposition will start July 1, and close on August 4. The matter of granting the exhibition authority to erect the buildings will be considered this afternoon by the Public Safety Committee of the Council.

Curious Custom

At Tarpon Springs, Fla., a Greek priest, annually throws a cross of the Greek Church into the river. The Young Greeks dive for it, and the one recovering it is held in high esteem and given a university scholarship.

Wife of Rich Beach Oil Man Given Divorce

Mrs. Ethel P. Mitchell, daughter of a well-to-do oil man of Long Beach, yesterday was granted a divorce from her husband, John F. Mitchell, in Judge Summerfield's department in Superior Court.

Mrs. Mitchell testified that her husband apologized to her for excesses in the use of liquor and association with other women. She quoted him as saying, "It is just the animal in me." They were reconciled, she declared, but she said her husband resumed his former excesses, and she was compelled to leave him again.

Mrs. Mitchell also testified that her father had paid all the expenses of her married life.

Up-to-the-Minute

"What sort of present did the bank president give his daughter and new son-in-law?"

"An automobile."

"And where did they spend the honeymoon?"

"In the hospital."—(Washington)

Motor Busses Strongly Urged on Commission

The hearing on the petition of C. D. Gulick for permission to establish three bus lines between Los Angeles, San Diego and points in the San Fernando Valley was resumed yesterday before Examiner Handford of the State Railroad Commission.

Mr. Gulick and Secretary Bush of the Hollywood Chamber of Commerce were the only witnesses who testified yesterday. Both told the need of such bus lines and declared that residents in Glendale and the San Fernando Valley desired such service.

Present at the hearing were Attorney McFarland of the Glendale and Nontrose Railway, Matthew B. Jones, attorney for Gulick and Attorney Gortner of the Pacific Electric, who is opposing the petition. The hearing is expected to continue through today and Wednesday. It was begun about a month ago but discontinued and no action was taken.

NEW RULING APPLIES TO RETAIL TAX

Collector Goodcell Gets Decision on Pricing Plan of Inventory

A decision received recently by United States Collector of Revenue Goodcell affects every retailer in Southern California, as it amends existing income tax regulations dealing with the so-called "retail method" of pricing inventories and fixed rules by which the system may be applied to merchants.

The income tax regulations provide that any retailer merchant may use of such method in designating the return, that accurate accounts are kept, and that the method is consistently adhered to. The "retail method" is essentially a cost method of valuing inventories, but the rule is not inflexible. On a constant or rising market, it is apparently a "cost" method, but on a falling market it may result in a reduction to "cost" or market, whichever is lower.

The provisions of the regulation providing that accurate records must be kept, contemplate that certain records shall be kept by departments in permanent form for the inspection of internal revenue officers. Purchase records should show the firm name, date of invoice, invoice cost and retail sales price. A permanent record should also be kept of the accumulation of all department purchases, mark-downs, sales, stock, etc.

Under the retail method the goods in the inventory are ordinarily priced at the selling prices, and the total retail value of the goods is reduced to approximate cost by deducting the percentage which represents the difference between the retail selling value and the purchase price.

In computing the percentage proper adjustments should be made for the mark-ups and mark-downs, with respect to original retail price.

Los Angeles (Loce Ahng-hay-lis)
 LOS ANGELES OF THE ASSOCIATED PRESS
 The Associated Press is a member of the United Press Association, Inc., and is a member of the International News Service, Inc.

THE COLOR LINE
 Colored motion pictures seem to go well except down Mississippi way. Part of the South is still inclined to draw the color line.

DIET OF PEACE
 When the world is as it should be the diet of the nation will be the diet of the leaders of the citrus industry in California.

THE BIG TEN
 The movie magnate is seeking locations for use in filming the Ten Commandments. It is necessary to go a long way from Hollywood to find where most of them were broken.

FRANCHISING ALLIANCE
 Senator Johnson is mentioned in the dispatches as taking in Monte Carlo with Mary Garden and Suzanne Lenglen. First thing we know Hiram will be writing home the money.

PROPERTY OF DOUGH
 Bank deposits in Los Angeles have increased more than 11 per cent in the last quarter and now amount to more than \$75,000,000. This is around \$1000 per capita. Have you got yours?

THE YOUNG IDEA
 Classes in shorthand writing have been opened in the University of Southern California. This is a belated but important recognition of our second leading industry. We might have said first, but did not care to start an argument.

BRASH BURGLARS
 Burglars are said to have broken into the vaults of the Hall of Justice and stolen 144 gallons or more of liquid evidence. The District Attorney had accumulated in cases for the violation of the Volstead Act. Nothing seems to be safe. If we do not build our jail tighter thieves will be breaking in.

GOING UP IN COMING DOWN
 The Navy Department has completed a test of a new motor for airplanes. The engine ran like a watch for 573 hours without a stop and with a reduction of nearly 100 per cent in cost of operation. If we can thus lower the cost of high soaring it should help the country a lot. When the day of going up is coming down we should be able to make both ends meet.

LOW MOTION
 It has been found that a large printing plant—one of the big industries of Germany—has been turning out billions of counterfeit marks. They were thought to be an improvement on the government issue, as they were on slightly better paper. But it would seem like lost motion to make a business of counterfeiting the German mark. The label from a California apricot can is worth 1000 German marks, as it is.

THE GAME OF PHAROAH
 There is some evidence to show that Pharaoh Tutankhamun indulged in the game of chess in his lifetime. There is proof that a pastime much the same as chess amused the royalty of ancient Egypt. There is nothing, however, to indicate that Old Tut killed any time on mah jong. He would have made a good poker player, according to the representations of his face, but he liked Pharaoh best.

SCHOOL DAYS
 Chances are made that high-school students in Pasadena are filling the streets with cigarette smoke. It is forbidden for anybody to smoke on the cars in Pasadena, and Pacific Electric employees are asked to assist in suppressing the youthful puffery. The street-car men are inclined to pass the blame back to the Board of Education. It is suggested that a rule calling for the expulsion from the schools of all street-car smokers would make a good start. In the meantime some of the students are said to be puffing defiance in both directions. There is some question in Pasadena as to whether a cigarette is a question of public morals or public health.

SCHOOL POLITICS
 The remarks of Gov. Richardson concerning the public schools of California will be considered the utterance of unfriendly lips in some sources and yet the Governor is proving himself a sponsor of the cause of education. He rightly objects to the use of the taxpayers' money for the purpose of extending political domination of the public schools. He wishes that the people themselves shall take serious knowledge of the price of school operation and its sources. The Governor has the schools are prone to divert too much attention to what may be described as fads. He directly charges that in the important items of spelling, reading and arithmetic the pupils of today are deficient. There are too many demands upon the school day to do justice to the studies that are material and essential. The Governor has no intention to desire to prune school appropriations to the quick, but he does want the schools to "deliver the goods." If the teachers and educational leaders will keep the schools aloof from small-bore politics there will be less controversy over the State appropriations. To use the schools to extend personal ambitions or educational fads is unjust, alike to the taxpayer and the pupil.

WHY LOS ANGELES GROWS

Natural advantages with their potent development possibilities have hitherto dictated the location of the great cities of the world. This has been especially true in the United States. The Pennsylvania and West Virginia soft-coal fields made Pittsburgh possible. Cleveland grew by reason of its position on the Great Lakes and the short haul from the coal district. New York, Chicago and San Francisco are great cities built on favorable ports.

Their location and growth are easily explained; they are the products of a well-recognized economic law. But how is it to explain the appearance of Los Angeles, a new and blazing planet in the commercial and industrial heavens? Twenty-five years ago men of vision and economic wisdom came to Los Angeles for pleasure and recreation. It was a kind of winter-and-trip. They said that the climate was unsurpassed and the valley beautiful; but that Los Angeles could never be more than a city of leisure. It lacked the three absolute essentials for commercial and industrial development: water, timber and fuel.

This sage reasoning, based on experience, there seemed no answer. Los Angeles, the beautiful, was doomed to hopeless mediocrity. There were a few intrepid spirits, however, who refused to accept this verdict as final. They possessed the old-fashioned faith that God helps them who help themselves. On to put it another way, they held that what ought to be done can be done.

Water was essential; and Los Angeles ought to have it. Engineers became interested. They sailed forth to interrogate the desert and the waste land of the Sierras. And when they returned they brought with them the inexhaustible supply of the Owens Valley.

Lumber was plainly an essential; a city of adobe was not practical. There was lumber enough in the Pacific Northwest to build fifty cities. A part of it ought to be brought to Los Angeles. So a port was built in the marshes and the sand dunes at the ocean front. God had placed a harbor there and then covered it up with sand until a race should come intrepid enough to develop it and enjoy it. Where the broadest water once lay and the tides grew in now the greatest lumber port of the world. The forests of the northern mountains have been transformed into the cities of the southern valleys.

Fuel was still lacking; and fuel is an absolute essential to industry. Without fuel Los Angeles could not compete with the great industrial communities of the East and the Middle West. Hydroelectric development first came to the rescue. Science had discovered the potential force of the white fuel that was eager to waste in the desert mountains. Engineers discovered how to harness the mountain streams, how to turn to industrial use the great blanket of snow that covered every winter the high Sierras.

But hydroelectric development is slow, especially when companies are harassed by political interference with business; when jealous demagogues awaken the envy and cupidity of the credulous. But the fuel problem, an unavoidable handicap, has been solved for the present generation by the discovery of enormous pools of oil hidden deep under the earth, at the harbor was laid in the sands; right at the gates of the city.

Within a radius of thirty miles of Los Angeles is an oil field that is now producing more than one-fifth the world's daily supply. And the development is in its infancy. Its possibilities stagger the imagination. The pump now appears the great output of the eastern fields compared with the full oil pouring from the earth right on the edge of our industrial district! Los Angeles has a supply of cheap fuel unequalled by any other industrial community in the world.

Some doubters may assert that, with time, the oil fields will be exhausted; that our prosperity is but temporary. But their argument is confounded by the hydroelectric development which will be going ahead while we are draining the great oil pools. With the damming of the Colorado River and the further development of power sites in the Sierras Los Angeles can secure more hydroelectric power than the entire present supply of the United States. And it will be necessary for us to take only a moderate part of the Colorado River power, coupled with our home supply, to provide for an industrial district with double the present consumption of any other in the nation.

Water, lumber, fuel—these three essentials that were so palpably lacking twenty-five years ago—Los Angeles now has them all, and in an abundance. What man could undertake a century ago ought to be done now as has been done. We have the three essentials, and a fourth that is as necessary as all the others, good citizenship. This last is one that we must be eternally vigilant to maintain. Without it the sand will return to the harbor and the city will be a thing of the past.

Every great achievement, like a great disaster, carries its moral lesson. That of the conversion in a generation of an adobe village in a desert into a modern metropolis is to be found in the ancient adage, "God helps them that help themselves."

PASSING THE TRILLION MARK
 There is perhaps significance in the fact that Germany has now in circulation 8,000,000,000 marks. The trillion thus makes its bow in finance. On paper, Germany is the possessor of fabulous wealth; and the United States, with less than \$4,000,000,000 of paper currency, is a veritable pauper.

Grandpop Shows 'Em He's Still a Sport

(Protected by J. M. Dushbar)

to be about thirty times that of a century ago. Are the soil and the sea rich enough to permit a similar increase in the next 100 years? If they continue to stand the strain of multiplying human wants the term trillion will be as current as that of billion at the present day.

One would have imagined in 1860 that the end of a century in which there would be such a vast increase in wealth would find poverty banished and the world prosperous and contented. Compared with the past the world is prosperous; but our real and fabled wants have multiplied at such a rate that it is far from contented.

KINDNESS AND CRUELTY
 According to a now established annual custom this week is dedicated to the prevention of cruelty to animals, an object with which every normal man or woman is in complete sympathy.

But isn't the punishment of wrongdoing people of a plain and manifest duty somewhat of a reflection on accepted standards?

Cruelty in any shape or form is so repellent, so degrading, so destructive of all social relations that a special period to remind us of the fact ought to be superfluous.

It is too much like setting aside seven days to protest against robbery or drunkenness or treachery or arson or homicide.

Every week in the year should be a prevention of cruelty week—the man or woman who would be wantonly cruel to a bird or beast is capable of deliberate cruelty to a human being. Against such there is no closed season.

Every week in the year should be an incitation of kindness week. To teach kindness to the helpless animals is to teach kindness to all who are weak or troubled or heavy-laden.

"He liveth best who loveth best. All things both great or small. . . . This text is universal and for eternity.

A SIGNIFICANT DATE
 Preparations are now being made to celebrate the year 1936 as being the anniversary of important events in the history of our country. This date will come near to being the 400th anniversary of the conquest of Mexico by Cortes and of the circumnavigation of the world by Magellan. It will mark the 800th period of the purchase of the island of Manhattan from the Dutch for the Indian owners, thus showing that the world's greatest city is very young when compared with the leading cities of Europe, Asia and Africa.

As everyone knows, 1936 will mark the 100th year of the signing of the Declaration of Independence and it also marks the same anniversary of the founding of what was in its day one of the most beautiful of the California missions—San Juan Capistrano. The settlement of Los Angeles country began with the founding of Mission San Gabriel in 1771 and our city is just five years younger than the Declaration of Independence.

Counting backward 100 years from 1936 brings us back to the time when the steam railway in the United States was being laid out and measured, but a few miles in length as compared with the hundreds of thousands of miles of the present. In 1836 Smith, coming overland from the Rocky Mountains to Southern California, pioneered the way to the Pacific Coast for the great railroad systems that have since been built along the trails he marked out. It is now growing close to 100 years to the time when New England ships commenced to bring goods from China to the ports of Southern California.

In 1876 our first great American exposition was being held in Philadelphia. The modern growth of the city of Los Angeles may be said to have begun at the time of this last date, for it was then for the first time that through travel from the East to Los Angeles by railroad was possible. In

1880 the population of Los Angeles was 11,185; of Philadelphia, 417,170—just about the same as that of the Los Angeles of today; in 1930 the Federal census gave Los Angeles a population of close to 600,000 and Philadelphia about 1,600,000. It is interesting to speculate as to the relative rank of these two great cities in the year 1976.

TWO MINUTES OF OPTIMISM
 BY HERMAN J. SMITH

The Miracle Current
 According to Roger W. Babson, selling electrical merchandise offers greater financial returns for the future than any other business and, with the consummation of huge electric projects, is destined to reach stupendous proportions.

Here is an idea well worth careful consideration. Electricity is a wonderful field, and practically a virgin one. Did you ever consider the high voltage power of ambition?

How it helps us out! Add to you know one authority has told us that prayer is as real a force as electricity.

But at this if you will, yet remember the prophet has said: "More things are wrought by prayer than the world ever dreams of" and "God moves in a mysterious way his wonders to perform."

All this by way of introducing the theme that most successful folks are God-loving. Smile some more, if you wish, yet, recall great names of history and make diligent industry and you will find they were nearly all religious.

They accomplished in large measure through hard work, encouraged and given forthrightly by living in God, and they wrought wonderful deeds by means of pleading prayer—this miracle current that causes astounding light to flash.

How long since you sent a telegram to God? Not for some selfish desire, but for the other fellow.

Did you ever receive a wire from heaven? If you would grow and go on, align yourself with God and God-loving people; for it is those who believe in law, order and God who are the best people and the most loyal friends.

And it is right that the successful man or woman have religion. If it isn't, what is the use of a Bible, of places of worship, of striving, of anything?

RIPLING RHYMES
 FORGOTTEN PROMISES

I recall how I departed from my home, long years ago, how my aunt was broken-hearted and I saw her sad tears flow. "Oh, my heart is sad and heavy," said my aunt, "and life seems bleak; write to me, my darling, every week, write a letter once a week. You can stand your absence better, I can show a letter every week and keep your vow." "You can bank on that," I told her, "do not fret your heart, I beg; I will write or sprain a shoulder. I will write or lose a leg." And I surely meant to send her an epistle every week, but the city's glare and splendor made good resolutions leak. Now and then I thought of auntie, in that village by the sea, waiting, waiting in her shanty, watching for a line from me. "Oh, tomorrow I'll write her," I would often lightly say; and her hair grew white and whiter and her pep had faded away. Recently the grim destroyer took my aunt to her home; "She has left you," writes her lawyer, "nothing but her finetooth comb. She has left all kinds of money to the Home for Maltese Cats and the way you've acted, sonny, shows your head is full of bats." My remorse is never ending, I have failed in my sign, and the Maltese cats are spending rubles that are rightly mine.

WALT MASON.
 Ohio is again in luck—her Legislature has adjourned.

PEN POINTS
 By the Staff

Woodrow Wilson is a radio fan. He is getting his wave lengths ready for 1934.

Old Dock Cook has been nabbed in an oil scandal. He discovered something this time.

The pigeons must go from Pershing Square, but the gamblers, we still have the gentry with us.

Let it be said to the credit of Christopher Columbus that he never made any faraway voyages of discovery.

Harry Houdini is a marvel, all right, but he was never able to tell the Democrats how to get out of the political bog.

The Theocrats have carried Zion, Ill. We don't know who the Zionists are, but we presume they are "agin" the government.

Another thing we cannot understand—the statement that the government flyers are first of on one leg and then on another.

The banners of the Mayorality candidates have been hung to the breeze. It is not a bad thing to get one's flag early in the campaign.

Wonder if Father-in-Law Woodward of "Bumminham" is financing the Oscar Underwood boom for President. If so, he has a long way to go.

What a convenience the telephone is to the neighbors. What has become of the old-fashioned woman who used to scream at a mouse?

Woodrow Wilson is giving an imitation of a man who is returning to political consciousness.

So far none of the Eurylogists operating at Luxor have discovered the tomb of Adam. But give 'em time.

It now looks as if the Democrats will have a candidate against President Harding in 1934. Chairman Hull is now out on a still hunt for somebody who needs the exercise.

Thousands of Chinese students in the United States have united in a protest against widespread misrepresentation of their race in the motion pictures. The complaint seems to be well founded. The Chinese are no longer typical of a Chinese gentleman and gambler is not a national sport, but, as it is in every other country, a pastime of the idle. Will Hays has quite a job on his hands.

THIS IS THE DAY
 King James I of England granted a charter to the London Company for territory between 34 and 38 degrees north latitude in America and to the Plymouth Company for territory between 41 and 45 degrees, including all the country from New York to Halifax, in the year 1606.

NATURE SKETCHES

A. CALIFORNIA DESERT SKETCHES
 BY CHARLES LINCOLN EDWARDS, JR.
 Director of Nature Study, Los Angeles City Schools

The common understanding of a desert is founded largely upon school-book descriptions of the Sahara. One thinks of a vast waste of sand, with little or no rain, intense heat and violent storms of dust hurrying sand clouds madly through space. Observed by this conventional notion of the tenderfoot my first night in the Mojave Desert was a revelation. Rain fell in torrents all through the night.

It is true, however, that the chief condition for maintaining a desert is the lack of rainfall during most of the year. In the rainy season a heavy cloudburst will produce a torrent, pouring down the rocky mountainsides and roaring through the canyon. This stream carries broken rock and soil, forming a broad delta of the larger rocks and gravel at the mouth of the canyon. Then the water spreads out, distributing the smaller particles for miles and thus adding this layer to the desert soil. The loose, crumbling, sandy soil does not hold water and so the stream is soon lost and the channel becomes a dry bed, or wash, until the next rainy season.

There are almost no running streams originating in the desert. The Colorado River finds its source in the distant mountains. The desert regions of Eastern California are a part of the dreary and desolate great basin which extends from the Rocky Mountains westward to the Sierra Nevada and the ranges lying to the south. This high, massive mountain wall on the west slopes the moist air currents from the Pacific and thus is the chief cause of the desert formation.

The California Desert is made up of wide valley plains of gravel and sand hemmed in by rocky and jagged mountains. This scant vegetation of the steep slopes and cliffs is lost to sight at some distance where the mountains seem utterly barren.

ANNUAL RAINFALL LOW
 The annual rainfall is very low, varying from ten inches to less than one inch, with great evaporation during the long, dry season. At times two years will pass with but very little rain and some portions of this region are the most arid in the United States. Here and there are alkaline or saline lakes which dry up in the hot summer, leaving a white crust.

Most of the plants grow year after year. The herbs and flowers which spring from seed live but for one season. Only a few have fleshy fruits or show adaptations for water storage. The roots of the mesquite may grow down fifty feet in search of water. Death Valley at one place is 274 feet below the sea level. It has large and dangerous salt and alkali marshes.

The Mojave Desert has been formed by the wearing away of ancient mountains by water and wind. The uplift of the Sierra Nevada and the Coast Range blocked the streams which once flowed to the Pacific. In the course of many ages the deposited waste of this region has been carried down to the level of the sea. The old, worn remnants of the ancient mountains rise above the desert floor.

EASY-CHAIR SCIENCE
 BY RANSOME SUTTON

XV. THE GIFT OF WORMS GAVE TO THE WORLD
 In the cozy beds of the shallow Cambrian seas lay innumerable worms. Some were larger than others, but all were quite small. Not all belonged to the same species; some were aristocrats, if you please. There were four grades: one gave rise to the trilobites, the second to the graptolites, the third to sea urchins, and the fourth, the lowliest of all, gave rise to ascidians, which were also worms.

The worms of the Cambrian period were simple sea food-shapeless, spineless, senseless masses of flesh. Bilateral symmetry was the only thing that gave them a head and a tail end, and right and left sides. They could move only in two directions, forward or backward, not sideways. Much more primitive than modern worms, however, the ancient ascidians were little more than elongated tubes, typical skin-and-stomach specimens. But along the top of the hollow tube, where the two sides of skin roiled together, lay a line of cells, end to end, extending lengthwise of the body.

That was as far as ascidians went. It was not very far, but it was farther than any other creature had gone in that direction. Certainly the laying down of that line of cells meant infinitely more to the world than the marvelous tentacles of the octopus and sea anemone, for that notochord of cells was the beginning of the backbone!

Like great human inventions which are left unfinished by one generation to be completed by subsequent generations, the work begun upon the backbone by ascidians was carried on by lancelets (Amphioxus lanceolatus). When Linnaeus, the father of all modern systems of animal classification, first beheld a lancelet he thought it a worm-like snail. Indeed, a lancelet resembles a worm much more closely than a fish. It may better be pictured as a finger of flesh. Unchanged descendants are still being dug up from wet sand. Since these fingers of flesh are almost transparent one can easily see with the naked eye the line of cells, which were only the clearest waters of the world, to migrate into all the seas.

Very little imagination is required to understand what backbone meant to living substance. It enabled fishes to rise out of the ooze into the clear waters of the world, to migrate into all the seas.

THE LAST OF THE
 It was a beautiful day, a warm day, a day when the sun was shining brightly and the wind was blowing from the south. I was walking along the beach, looking at the waves as they broke on the shore. I was thinking of the old days, of the days when I was a child and I used to walk along the beach with my father and mother. I was thinking of the old days, of the days when I was a child and I used to walk along the beach with my father and mother.

LONDON FILM GIVEN PRAISE

"Sourdoughs" of '97 Assembled Here for Preview of "Call of the Wild" Picturization

Probably the most unusual audience ever assembled for the preview of a motion picture is now being gathered by Warren Doane, general manager of the Hal Roach studio, for the initial showing of the London film "The Call of the Wild," which Fred Jackman has just completed.

To the "sourdoughs" who blazed the trail from Skagway to Dawson City in the feverish days of 1897 will be accorded the distinction of viewing first "The Call of the Wild." From all parts of California, these sturdy pioneers are expected to gather for the preview of London's greatest story. Many men who won fame and fortune in the first flush of the gold rush already have given their assurance that they will attend the exhibition.

PRAISES FILM

A. V. Dedrick, now a real estate operator in Palms and one of the best-known "sourdoughs" in the Klondike history, and his wife, who was the first white woman to enter in Dawson City, were invited to some of the rushes during the production. They actually lived over the "Edmonton trail," and ran a dog team for the trail Northwest Mounted between Skagway and Dawson. He never joined the force, however, being an American.

Dedrick and his wife know every foot of the country which London wrote so vividly about in "The Call of the Wild" depicting the

Daylight Films on Set Latest Studio Scheme

Director Wallace Worley, Universal director of "The Hunchback of Notre Dame," has inaugurated daylight films on the set and street set at Universal City.

He has a portable projector with miniature screen set in a box which shows his daily films just as in the regular theater. When the "rushes" or hurry-up films are ready, they are shown to the director between scenes, instead of piling up at night. This also gives the crew and director a better chance to detect flaws in the film, etc., for which retakes "can be made earlier than heretofore."

This is the first time in the history of motion-picture making that the pictures were ever taken and arranged on the spot. It saves much time and waste, and may work a revolution in the industry, especially for locations distant from the studio. Of course, daylight pictures have appeared before, but never were they used at a studio in this novel manner.

Marie Prevost Taking Lead in Goulding Play

Following the announcement that John M. Stahl has selected Marie Prevost to play the lead in his production of "The Wanters" for Louis B. Mayer, comes the news that the star will be featured by the Warner Brothers in "Broadway After Dark," a special production of the story by Edmund Gendling.

This screen author, who has to his credit such screen adaptations as Joseph Hergesheimer's "The Bright Shawl" and "Tolable David," starring Richard Barthelmess, and his original story of "Pursued" for the same star, as well as several Mae Murray pictures, recently arrived from New York under contract with the Warners.

Miss Prevost's engagement in the leading feminine role of "Red Lights," an adaptation of the novel of Edward E. Ross's mystery melodrama, directed by Clarence Badger, will be completed within the next week. After a brief vacation, she will move her dressing-room over to the Mayer studio to begin her engagement in "The Wanters."

DRIVE FOR MEMBERS SUCCEEDS

Y.M.C.A. Campaign Prizes Are Presented at Dinner in Central Building

Closing a very successful membership campaign effort, officers and members of the Los Angeles Central Y.M.C.A. met in the auditorium of that building Saturday night for the final dinner.

Dan H. Jones, known as "Y-C Chief" of the unique "Live Wire" drive announced that W. W. De Coo had won the gold watch awarded to the member securing the highest number of points in any one of the three ten-day periods of the campaign.

A total of 885 members were obtained for central branch, in the month from March 1 to the 1st inst., according to W. F. Howe, executive secretary, who expressed himself as greatly pleased with the showing made.

It was pointed out that these men secured through the drive and body-building activities conducted by the educational and physical departments a "live wire" feeling that fits them for leadership in their respective fields.

It was noted that such men as Mayor George E. Cryer, for seven years a member and constant attendant at games and gym classes, Robert Allen, City Councilman, and Mignonne Kohn, a pretty little French girl who presents a clever means of operating the musical instrument and telling jokes he succeeds in putting over a fairly good show. As far as the other acts of the show are concerned, they are of ordinary run.

One is a country-town act that manages to produce a laugh or two now and then. Gibson and Connell offer a skit, "One Night in Spring," that is amusing and interesting. Mignonne Kohn is a pretty little French girl who presents a clever means of operating the musical instrument and telling jokes he succeeds in putting over a fairly good show. As far as the other acts of the show are concerned, they are of ordinary run.

Wide Variety Found on New Hillstreet Bill

There is one outstanding feature of the program at Hillstreet this week and that is the wide diversity of entertainment that is being offered.

Everything from an animal act to a high-powered musical and dancing presentation is billed at the local playhouse, ranging from a moment of hilarious laughter to the weeping sob of an intended bride who couldn't decide just what she wanted to do.

It is difficult to determine what act should be given first honor, but there is one deciding factor that places the Ford dancers at the top of the list. They make an act in a high position by themselves. The dancers present a very entertaining dancing act which shows considerable skill.

It introduces new ideas in high-class dancing and skill. Each member of the quartet should be given favorable credit for a well-balanced program.

Max and Morris are two chimpanzees who walk on the tight wire, box, ride bicycles and number of other novel stunts. One is a circus to witness the supposed forerunners of our race and watch them demonstrate various tricks that could be considered difficult and impossible for the average human being to do.

They make a "monkey faces" light and smoke cigarettes, dance and wash dishes. Bert Howard has the ability to play the piano and to amuse. With instruction of several new means of operating the musical instrument and telling jokes he succeeds in putting over a fairly good show. As far as the other acts of the show are concerned, they are of ordinary run.

One is a country-town act that manages to produce a laugh or two now and then. Gibson and Connell offer a skit, "One Night in Spring," that is amusing and interesting. Mignonne Kohn is a pretty little French girl who presents a clever means of operating the musical instrument and telling jokes he succeeds in putting over a fairly good show. As far as the other acts of the show are concerned, they are of ordinary run.

FISHER JOINS INDEPENDENTS

Producer is to Supervise New Film Corporation's First Picture, "Youth Triumphant"

The ranks of independent producers have been augmented by the formation of a new concern, Fisher Productions, which plans to produce a series of offerings, the first of which will be "Youth Triumphant," from the story by George Gibbs, which ran serially in the Green Book magazine. An all-star cast is being assembled at the Hollywood studios, where the company will operate.

Victor B. Fisher will supervise the making of each production and attend to the business affairs of the organization. Mr. Fisher was for two years general manager of Associated Photo-Play. Prior to that he was associated in Super Art Productions and concerned in the production of "Bubbles" with Mary Anderson, and other photo-plays.

San Francisco capitalists are numbered among the officers and members of the directorate of Fisher Productions. Abraham L. Jacob, manufacturer of the northern city, is president; R. L. Blake, formerly affiliated with the California Trust Company of San Francisco, has the post of secretary, and Victor B. Fisher is treasurer.

Lillian Duloy will direct "Youth Triumphant" under Mr. Fisher's supervision. Duloy has considerable wide experience, having been associated with Allan Dwan, Eric Von Stroheim, and other directors. She is among the picture stars who are engaged in the past.

Work on the picture is being pushed on the first production. Negotiations are under way for the engagement of a child star.

FILM FOLK TO WATCH PREMIERE

Reception Will Precede Formal Opening Tonight of "The Covered Wagon"

With ceremonies preceded by "Pioneer Days," a stage spectacle participated in by a cast of fifty, of which twenty-five are Indians, the famous "Covered Wagon" production of the winning of the West, will be given its western premiere at Grauman's Hollywood Egyptian Theatre.

Cecil B. De Mille will be master of ceremonies at the reception preceding the picture, and will introduce the picture, and will make addresses. The picture, which is the winning of the West, will be given its western premiere at Grauman's Hollywood Egyptian Theatre.

Among those who have made reservations and will be present are Mary Pickford and Douglas Fairbanks, Jr., and other stars. The picture, which is the winning of the West, will be given its western premiere at Grauman's Hollywood Egyptian Theatre.

MAE BUSCH SIGNED FOR CAINE TALE

Star to Play Bessie in Seastrom's Picturization of "Master of Man"

Victor Seastrom has chosen the first player for his first American motion picture. The Scandinavian director has selected Mae Busch to play Bessie, the persecuted heroine of "The Master of Man."

It will be Mae Busch's second film. She is a Swedish actress who went to England with Maurice Tourneur to play Gloria Quille in "The Christian." "The Master of Man" is the story of a woman who is persecuted by a man who is a master of man.

The "Master of Man" is Caine's latest novel, and the only one unfinished. Goldwyn secured the screen rights after a spectacular and spirited bidding contest between several of the biggest producers.

Seastrom, known as the most artistic director in Europe, was given the story to film. He is now working with the indomitable energy by which he has achieved remarkable results in Sweden, on preparations for the story. Paul Bern is writing the continuity.

Mae Busch's work in Goldwyn pictures attracted such attention that the film corporation signed her under a long-term contract. Her latest release was in "Souls for Sale," Rupert Hughes' drama of cinema life, in which she played the motion-picture star.

OH, THEY'LL NEVER GET ON AT ALL!

Cawker City (Kan.) Miss Has Opinions About Pola and "Sharlee's" Case

Miss Ola Cronk of Cawker City, Kan., known as Miss Clara Winsor, heroine of the Goldwyn lot here, does not believe Charlie Chaplin will ever marry Pola Negri.

"We don't understand how the two of them can get so close together," she told New York reporters yesterday. "They're both so temperamental."

Charlie was once reported engaged to Charlie. She is now in New York City on a vacation. Incidentally, Charlie's vacation men there with her substitution.

For example when she was asked if she had any immediate matrimonial prospects herself she pulled a pail from a rose and allowed it to flutter to the floor. "I'm only to recuperate," she said. "Even if I had," she smiled, "do you think I'd tell you?"

The erstwhile belle of Cawker City declares she is in New York City only to recuperate. "This is my first trip East since I was a wee, little girl," Miss Winsor said, "and I'm going to have just a good time and rest as much as I can."

"I find it altogether difficult here from Cawker City, Kan., where I was born, and another of her remarks caught by reporters was interviewed her at the Hotel Algonquin.

E. T. TYNAN IS STRICKEN AT HIS DESK

Secretary of Government Civil Service Body Victim of Slight Stroke

Edward T. Tynan, for many years secretary of the Civil Service Commission, with headquarters in the Federal Building, was the victim of a slight stroke of apoplexy yesterday afternoon while on duty.

He was taken to the Receiving Hospital and then to his home at 1233 Windsor avenue. His physical condition is optimistic as to the outcome.

"Ed" Tynan has for years been one of the familiar figures about the Federal Building. He entered the postal service as a carrier in May, 1895, and in October, 1901, was made a clerk. Later he was appointed civil service secretary, and in addition had charge of supplies.

One of the sad incidents in connection with the sudden illness of Mr. Tynan is the fact that Sunday morning his closest friend, E. F. Richards, superintendent of Station F, who lived at 2116 South San Pedro street, died after a long illness, and one of his last missions before being stricken was to visit the home of his friend and tender his condolences to the family.

Mr. Tynan was born Dec. 3, 1858, at Longford, Ireland. He has been a resident of Los Angeles more than forty years.

HOLLYWOOD COUPLE PLAN AIR HONEYMOON

An airplane honeymoon trip is the plan of Mr. and Mrs. Edward Laemmle, who were wed Sunday evening in Chicago. The couple are on their way to Hollywood.

Mrs. Laemmle was Miss Peggi Heller of Chicago, and a sister of Mrs. Louis Laemmle. The bridegroom is a nephew of Carl Laemmle, president of the Universal Pictures Corporation.

RECORDS

WHENEVER you play
made with the old style
surface, those two irre-
pressible imps, Scratch
and Scrape, immediately
begin to shout, "Hear
Hear me!"

But, put a Columbia
New Process Record on
your phonograph and
from it surges music of
a crystal-clear beauty that
will amaze and delight you.

It is as if Columbia had
caught those boisterous
rogues and bound and
gagged them.

The only method ever
discovered which success-
fully reduces surface noise
to a negligible quantity is
Columbia's new process
for making records. The
center leaf is an extremely
hard material. Over this
are laid the playing sur-
faces, of a material so
velvety smooth and fine
that it creates but the
veriest whisper of a sound.

At the first note of music
even this disappears.

All Columbia Records
are now made with this
delightfully noiseless sur-
face. They can be played
on any phonograph.

If you would know the
perfection of a phonograph
go to a Columbia Dealer
ask to hear record A-3429
from the accompanying
program. It is "Falling
in Love" from the
newest and most
popular Broadway
show, "The Broadway
Melodrama." As you
listen you will catch all the
subtleties of the
orchestration which
only a Columbia
New Process Record
can give.

The process is patented.
No one can imitate
anything like it in making
records.

GOLFERS HIT IN WATER HEARING

Small Farmers Protesting Rate Revision

Are Affected by Victory of Country Clubs

City Council Is Requested to Change Schedule

Oh, didn't Chief Engineer Mulholland of the municipal Bureau of Water Works and Supply mail in to the country club golfers at yesterday afternoon's meeting of the City Council's Public Service Committee?

The country clubs use a large amount of water to keep their golf courses green, and the clubs said they were entitled to the water department's combination irrigation-domestic rate of 2 cents for each 100 cubic feet of water.

Chief Engineer Mulholland said "No." The clubs went to court and won, and so now the water department is asking the City Council to revise the combination rate for Mr. Mulholland said, if this is not done every person who has a lawn will be entitled to it, and then the department would have

SHE DARKENED HER GRAY HAIR

Tells How She Did It With a Home-Made Remedy.

Mrs. E. H. Boots, a well-known resident of Buchanan County, Ia., who darkened her gray hair, made the following statement:

"Any lady or gentleman can darken their gray or faded hair, and make it soft and glossy with this simple remedy, which they can mix at home. To half a pint of water add 1 ounce of bay rum, one small box of Barbo Compound and 1/2 ounce of glycerine. These ingredients can be purchased at any drug store at very little cost. Apply to the hair every other day until the gray hair is darkened sufficiently. It does not color the scalp, is not greasy and does not rub off. It will make a gray-haired person look twenty years younger."

Pacific Southwest Review

BY J. B. RUTH,

Comptroller, The First National Bank of Los Angeles and the Pacific Southwest Trust & Savings Bank.

Below are published the statements of condition, as of April 3, 1923, of The First National Bank of Los Angeles and the Pacific Southwest Trust & Savings Bank (formerly the Los Angeles Trust & Savings Bank) together with the capital and surplus of the First Securities Company, the three institutions being under one ownership and one management.

The aggregate resources of The First National Bank of Los Angeles and the Pacific Southwest Trust & Savings Bank, under the latest calls for statements of condition, are \$243,957,084.80.

The aggregate deposits of \$214,898,554.89 are comprised of \$76,141,965.03 for The First National Bank of Los Angeles and \$138,756,589.86 for the Pacific Southwest Trust & Savings Bank. The latter deposits are divided, \$69,196,087.52 in commercial accounts and \$69,560,502.34 in savings accounts.

The aggregate cash and sight exchange of \$52,333,313.50 is shown in the statements of The First National Bank of Los Angeles, \$24,533,925.10, and the Pacific Southwest Trust & Savings Bank, \$27,799,388.40. The detailed statements follow:

about \$2.40 to conduct its million-dollar business. The country clubs use a large amount of water to keep their golf courses green, and the clubs said they were entitled to the water department's combination irrigation-domestic rate of 2 cents for each 100 cubic feet of water.

Chief Engineer Mulholland said "No." The clubs went to court and won, and so now the water department is asking the City Council to revise the combination rate for Mr. Mulholland said, if this is not done every person who has a lawn will be entitled to it, and then the department would have

Oh, didn't Chief Engineer Mulholland of the municipal Bureau of Water Works and Supply mail in to the country club golfers at yesterday afternoon's meeting of the City Council's Public Service Committee?

SHE DARKENED HER GRAY HAIR

Tells How She Did It With a Home-Made Remedy.

Mrs. E. H. Boots, a well-known resident of Buchanan County, Ia., who darkened her gray hair, made the following statement:

"Any lady or gentleman can darken their gray or faded hair, and make it soft and glossy with this simple remedy, which they can mix at home. To half a pint of water add 1 ounce of bay rum, one small box of Barbo Compound and 1/2 ounce of glycerine. These ingredients can be purchased at any drug store at very little cost. Apply to the hair every other day until the gray hair is darkened sufficiently. It does not color the scalp, is not greasy and does not rub off. It will make a gray-haired person look twenty years younger."

Queer Accident to be Sifted at Coroner's Quiz

(EXCLUSIVE DISPATCH)

EL CENTRO, April 9.—Coroner W. L. Lyons held a quiz today to determine the cause of the death of a man who died here yesterday.

The man, who was identified as Jose Perez, 35 years of age, a Mexican, died at the El Centro Hospital. He was found by a man who was driving a car when he saw the man lying on the ground. The man was taken to the hospital and died shortly after he was found.

The coroner's quiz will be held tomorrow at 10 o'clock.

SEEK NEW NATIONAL BANK

Fred Swensen Signs Application for Permit to Organize Institution With \$500,000 Capital

Los Angeles is to have a new national bank if the Comptroller of Currency in Washington approves an application for permission to organize filed with him yesterday. It is learned from dispatches from Washington.

Fred Swensen, officer in charge of business development of the California Savings Bank, signed the application. With him are associated F. G. Hayward, retired capitalist and owner of F. G. Hayward Company, Ltd., of Toronto, Canada, and a resident of Hollywood; Walter G. L. Smith, manager of the E. M. Smith Company and the West Coast Asbestos Company; Downey, Edgar Hughes, junior member of the law firm of Gouge, Robinson & Hughes; John E. O'Rourke, controller of the California Bank and Hugh Evans, resident.

The proposed new bank is to be located in the downtown district, and is capitalized at \$500,000, with a surplus and contingent fund of \$100,000.

Mr. Swensen last night refused to make any statement relative to organization plans, declaring that the bank is not yet organized. He said that the bank is not yet organized and that the bank is not yet organized.

The bank is not yet organized and that the bank is not yet organized. The bank is not yet organized and that the bank is not yet organized.

The bank is not yet organized and that the bank is not yet organized. The bank is not yet organized and that the bank is not yet organized.

Hamburger's
for Home Furnishings

Three Days' Free Trial!

Westgate Electric Cookers

—and you need pay only 5.00 down if you decide to purchase one—then easy payments

See it demonstrated this week! One of the very newest innovations for conserving the home-keeper's time and energy. A practical electric cooking cabinet—the Westgate. It cooks foods deliciously (saving the most nutritious substances)—it can't burn—costs little to operate, and actually pays for itself in the food it saves. Attend the demonstration. If you wish, we will send a Westgate to your home for a three-day free trial.

—Demonstration all this week on Hamburger's fourth floor.

YOU'LL BE SORRY

If You Don't Register Pretty Quick for this Beautiful \$5000 Home to be Given Away FREE at GREATER GOODYEAR PARK

GREATER GOODYEAR PARK

Over \$3,550,000 Worth of Lots Sold to Date

That is the amazing record of sales since Oct. 1, in GOODYEAR PARK and GREATER GOODYEAR PARK!

Over 300 dwellings, stores, etc., have been constructed, over 7 miles of streets, 7 miles of gas line, 7 miles of electric wires, 7 miles of pipe and 14 miles of sidewalks and curbs installed!

300 homes mean a population increase of approximately 1000. The tax assessor will tell you land values increase \$1000 for each resident. That means

Values Have Increased \$1,000,000 in Greater Goodyear Park

How much of this profit have you made?—or missed? How much longer will you hesitate?—Why?

GOODYEAR PARK is bounded by 4 important boulevards: Central Ave. going to Harbor, Manchester and Florence crossing city, Central Ave. going to Harbor, Manchester and Florence crossing city, Central Ave. going to Harbor, Manchester and Florence crossing city.

South Park going to Harbor, Manchester and Florence crossing city, Central Ave. going to Harbor, Manchester and Florence crossing city, Central Ave. going to Harbor, Manchester and Florence crossing city.

cent car service (Central Ave. line and San Pedro St. marked Meridian) factories will be built just across Florence Ave., the \$1,250,000 John C. ... school, just across South Park.

Is there any location MORE CERTAIN? THINK!

Home Sites . . . \$ 950 up

Business Sites . . . \$1300 up

Small payment down, balance easy terms. 5% off for one-half cash. building restrictions. Perpetual race restrictions.

Says Dangerous Varicose Veins Can Be Reduced at Home

Rub Gently and Upward Toward the Heart as Blood in Veins Flows That Way

If you or any relative or friend is worried because of varicose veins, or because of the fact that anyone in this world can give you a prescription that many physicians are now prescribing. Ask your druggist for an original two-ounce bottle of Moones Emerald Oil (full strength) and apply night and morning to the swollen, enlarged veins. Soon you will notice that they are growing smaller and the treatment should be continued until the veins are of normal size. So penetrating and powerful is Emerald Oil that it dissolves goitre and wens and causes them to disappear. It can be secured at any pharmacy. [Advertisement]
